

Services Provided by Qconnect and its Principals

- **Investments in US Companies:** We have acted as an agent and advisor to set acquisition criteria, screened and evaluated candidates and closed transactions. Industries have ranged widely from resort, hotel, residential and commercial real estate, business systems, wholesale and retail grocery business, automotive parts distribution to media companies. In some situations, we have created special purpose US or Offshore LLCs (limited liability companies) as vehicles for these investments, which we then actively managed. We anticipate expanding our actively-managed investment programs in the US as currency relationships offer historically attractive values.
- **Personal Asset Management:** The hallmark of our firm is our close relationships with our clients - we seek at all times to be their “Trusted Partner” that can be relied upon always. As such we have assisted international clients to achieve their goals to purchase real estate, spend additional time in the United States and become part of local social settings. These activities have included providing assistance in purchasing US properties, creating financial services relationships, assisting clients in joining private member clubs and even establishing health care treatment relationships in the US to help our clients feel relaxed and safe while away from home.
- **Fund of Funds:** We will soon be able to offer “fund of funds” financial products specially tailored to the needs of our offshore investors. These funds will focus on global and regional hedging strategies, private equity and venture capital. Our approach will offer our clients the very top level of management in these high return asset classes.
- **Sales, Marketing and Media Relations Advisory Services:** We have leveraged our connections to over 3,000 media contacts to gain all levels of global awareness for our client’s products. Establishing a “Marketing Plan of Action and Milestone” early on in the process, we have assisted in the development of many successful product launches - strategically positioning client assets to ensure the highest return on investment.
- **Asset Advisory Services For Club Marketing and Management:** We have assisted US and international clients in meeting the challenges in club management and marketing. We have utilized proven methods to establish world class programs and processes to improve club revenue and/or reposition clubs faced with new market pressures.
